

Practicum Letter of thanks

To whom it may concern,

Luidmila Rabinovich graduated from the "QA engineer" course and worked from June to November 2022 as part of a QA team testing a mobile application for IOs "Clean Games".

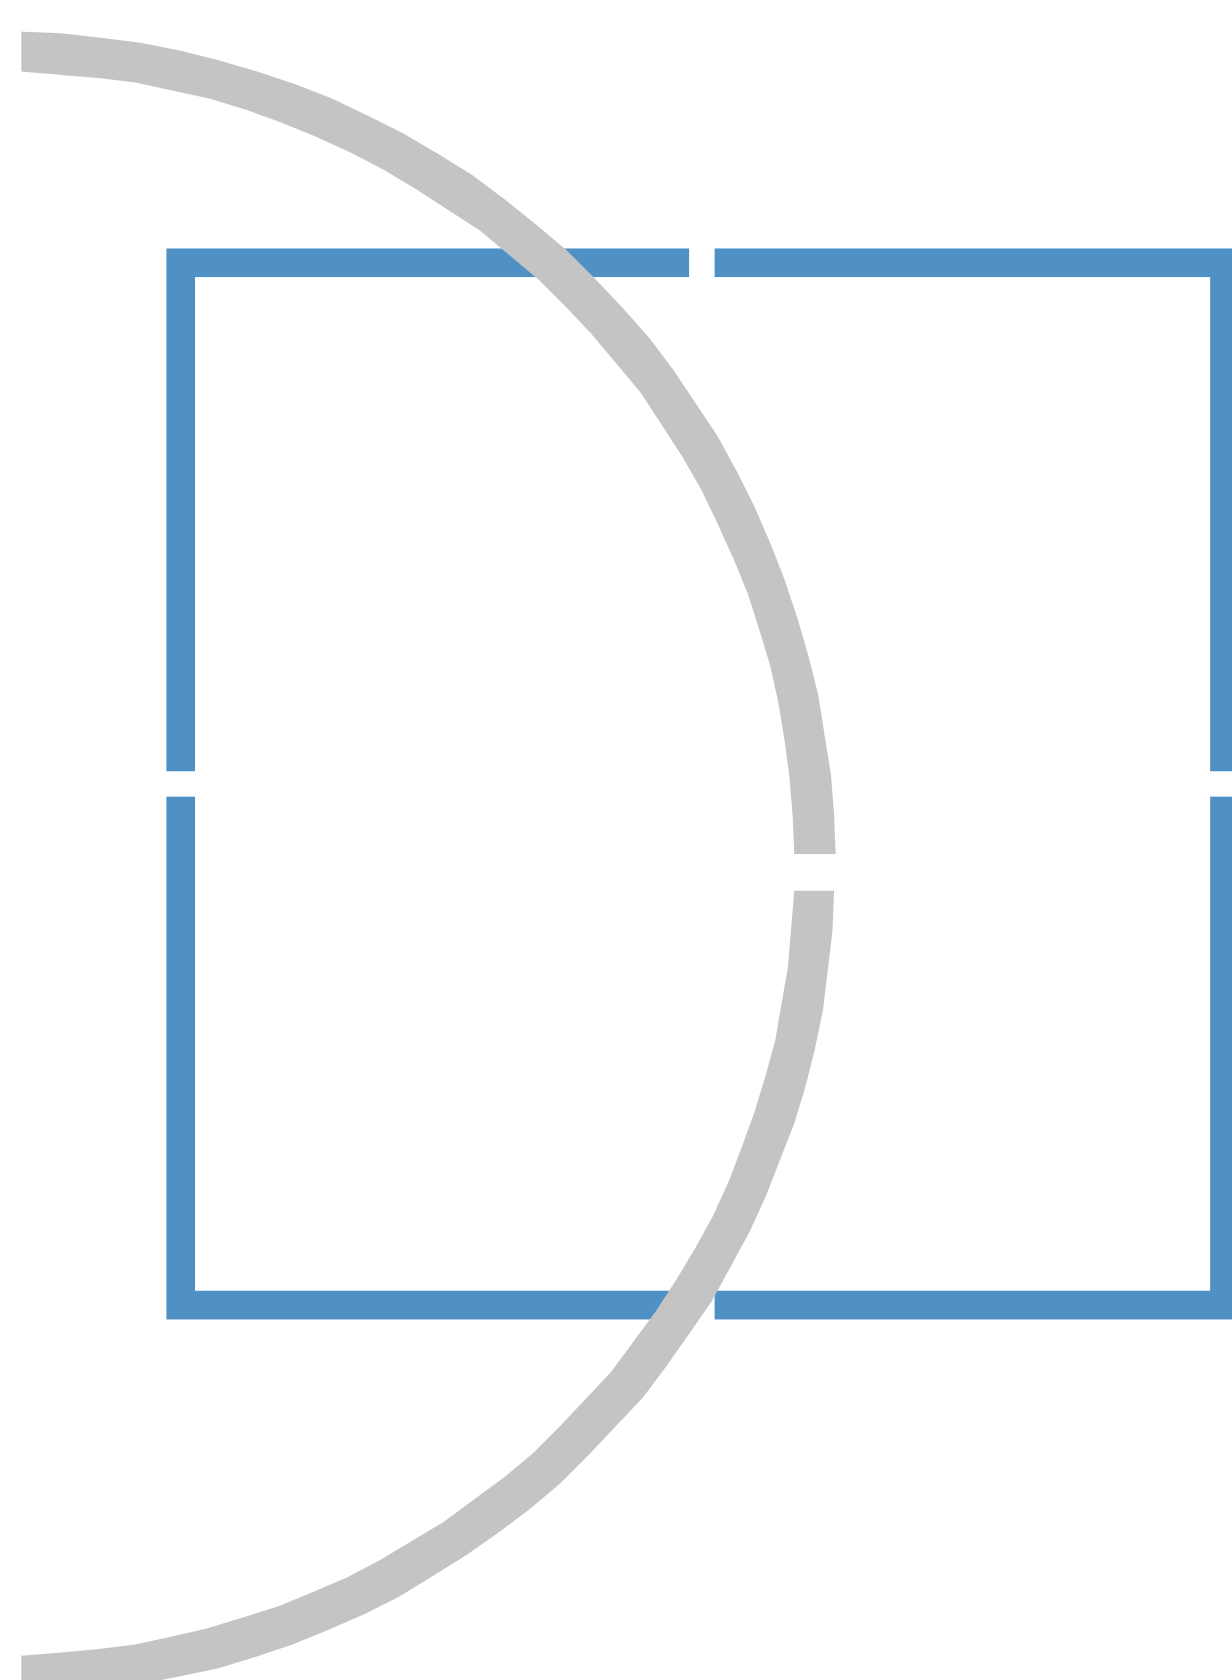

By following the technical task and maintaining outstanding professionalism throughout, all the team members successfully tested the project.

We, the Workshop team, would like to thank Luidmila for her work on the project and her willingness to take responsibility for complex tasks.

We are convinced that her experience working at the Workshop gives Luidmila an edge in developing careers further as a QA engineer.
